

Product name: Graffiti Remover Mild

Product-Information Data

Graffiti Remover Mild

General Information

Graffiti Remover Mild is a safe alternate for all types of dangerous, harmful and environment unfriendly solvents and paint-removers which are used for cleaning ink-plates, ink-rollers, ink-screens in printing offices and graffiti removing.

Graffiti Remover Mild is human- and environment friendly and fully biodegradable.

Graffiti Remover Mild removes any kind of inks, like solvent based inks and water based inks.

Also usable for removing of dyes, paints, glues, ballpoint and lead markings etc.

The Issue/problem

- Aromatic solvents and harmful chemical removers are used frequently to remove graffiti, paints and inks
- These solvents are highly environment and human unfriendly
- These conventional solvents are irritating to the skin and eyes and can cause many problems
- Graffiti on synthetic materials, bricks and walls should be removed rapidly and efficiently

The Solution

After an intensive research at Arka International, we succeeded in developing an all-round biodegradable remover which is able to remove rapidly, easily and efficiently all kinds of graffiti, paints, inks, ballpoint and lead markings.

The usage of our Graffiti Remover Mild results in a cleaner, safer and a pleasant manner of removing graffiti, paints and ink.

Special Advantages

- Graffiti Remover Mild is safe to use on all kinds of surfaces like; stone, brick, metals, glass, aluminums, painted surfaces and synthetic materials etc.
- Graffiti Remover Mild cleans and removes fast and efficient
- Graffiti Remover Mild is human and environment friendly and fully biodegradable
- Graffiti Remover Mild removes all kinds of graffiti, paints, inks, ballpoint and lead markings

The Application

Graffiti Remover Mild is the answer for removing all kinds of graffiti, paints, inks, ballpoint and lead markings;

- On polycarbonate thermoplastics
- On ink-screens
- On painted floors and walls
- On tools
- On printing office machinery
- On all kinds of sensitive thermoplastics and synthetic materials

Graffiti Remover Mild can also be used for;

- Cleaning of paintbrushes
- Removing of multi component epoxy based coatings and (multi component) glues, adhesives.
- Removing of fly postings and stickers

Remarks

Graffiti Remover Mild, due to his strength, can cause lack of brilliance or delustre painted surfaces. Please test on an invisible edge or area before use.

For sensitive painted surfaces and some sensitive synthetic materials or plastics, Graffiti Remover Mild can be dissolved in water. Please contact us for further information.

Method of working

Graffiti Remover Mild can straightly be sprayed or can be brushed on the surface. It can be used for immersion or with a fabric immersed into Graffiti Remover Mild to remove the graffiti, paint or ink.

Due to the strong degreasing capacity of Graffiti Remover Mild, proper gloves are recommended.

Packaging

Packaging in 10 liter and 25 liter jerry cans, 200 liter drums or 1000 liter multi-box.
