

Product name: Graffiti Remover Strong

Product-Information Data

Graffiti Remover Strong

General Information

Graffiti Remover Strong is a safe alternate for all types of dangerous, harmful and environment unfriendly solvents and paint-removers which are used for cleaning ink-plates, ink-rollers, ink-screens in printing offices and graffiti removing.

Graffiti Remover Strong is human- and environment friendly and fully biodegradable.

Graffiti Remover Strong removes any kind of inks, like solvent based inks and water based inks.

Also usable for removing of dyes, paints, glues, ballpoint and lead markings etc.

The Issue/problem

- Aromatic solvents and harmful chemical removers are used frequently to remove graffiti, paints and inks
- These solvents are highly environment and human unfriendly
- These conventional solvents are irritating to the skin and eyes and can cause many problems
- Graffiti on synthetic materials, bricks and walls should be removed rapidly and efficiently

The Solution

After an intensive research at Arka International, we succeeded in developing an all-round biodegradable remover which is able to remove rapidly, easily and efficiently all kinds of graffiti, paints, inks, ballpoint and lead markings.

The usage of our Graffiti Remover Strong results in a cleaner, safer and a pleasant manner of removing graffiti, paints and ink.

Special Advantages

- Graffiti Remover Strong is safe to use on all kinds of surfaces like; stone, brick, metals, glass, aluminums etc.
- Graffiti Remover Strong cleans and removes fast and efficient
- Graffiti Remover Strong is human and environment friendly and fully biodegradable
- Graffiti Remover Strong removes all kinds of graffiti, paints, inks, ballpoint and lead markings

The Application

Graffiti Remover Strong is the answer for removing all kinds of graffiti, paints, inks, ballpoint and lead markings;

- On coated polycarbonate thermoplastics
- On ink-screens
- On floors and walls
- On tools
- On printing office machinery
- On all kinds of thermoplastics and synthetic materials, except on untreated or coated polycarbonate (apply Graffiti Remover Mild for these sensitive surfaces)

Graffiti Remover Strong can also be used for;

- Cleaning of paintbrushes
- Removing of multi component epoxy based coatings and (multi component) glues, adhesives.
- Removing of fly postings and stickers

Remarks

Graffiti Remover Strong, due to his strength, can cause lack of brilliance or delustre painted surfaces. Please test on an invisible edge or area before use.

For sensitive, painted surfaces and some sensitive synthetic materials or plastics we recommend Graffiti Remover Mild.

Method of working

Graffiti Remover Strong can straightly be sprayed or can be brushed on the surface. It can be used for immersion or with a fabric immersed into Graffiti Remover Strong to remove the graffiti, paint or ink.

Due to the strong degreasing capacity of Graffiti Remover Strong, proper gloves are recommended.

Packaging

Packaging in 10 liter and 25 liter jerry cans, 200 liter drums or 1000 liter multi-box.
